

Auxiliary Cash Handling Equipment

Coin Lift SC 93420

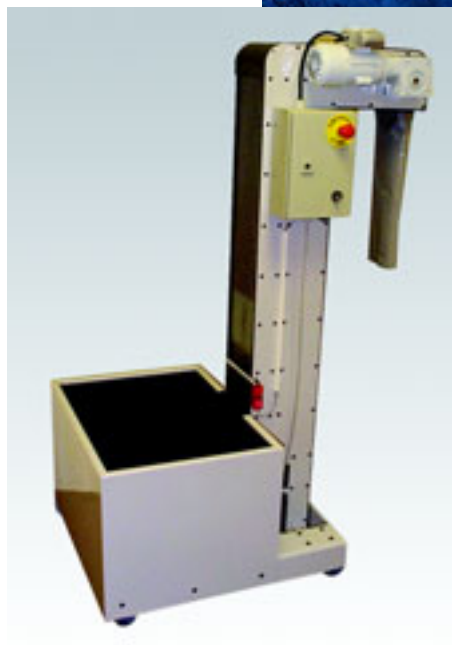

Feeds large volumes of coins into the coin sorter SC Active 4000.

Empty the coins from bags or boxes into the large hopper. The coin lift is connected to the SC Active 4000 with a cable for a practical auto start/stop function (feed control). The lifting belt has flights made of wear-resistant stainless steel.

The vertical part is covered by a transparent plastic, which prevents coins from falling off and makes the transport easy to supervise. For personal safety the machine stops automatically if the operator tries to reach a coin while the machine is running.

The complete unit is equipped with wheels to easily move it away for good access when servicing the SC Active 4000.

This coin lift is also recommended to feed all coin wrapping machines on the market. A similar model, SC 93500, should be used to feed the SCAN COIN BDO Sachet Machine.

Technical Specifications

Hopper volume:	15,000 coins (25 litres)
Feeding speed:	up to 4,000 coins/minute
Total height:	1,600 mm
Outlet height:	850 - 1,350 mm (adjustable)
Weight:	95 kg

Coin Lift SC 93365

As the SC 93420 but without the hopper. Instead coin wagons are connected to the lift (the lift itself has no wheels). For personal safety the lift automatically stops if the wagon is disconnected from the lift during operation (sensor control).

Normally we recommend two wagons to be ordered for one SC 93365 to have one extra when the first wagon is full. Coin wagons have to be ordered separately.

Technical Specifications

As the SC 93420, but with weight 70 kg.

Coin Lift SC 94620

Feeds large volumes of coins into the coin sorter SC Active 2200. Function as SC 93420.

Technical Specifications

Hopper volume:	14,400 coins (24 litres)
Feeding speed:	>3,000 coins/minute
Height (total):	1,420 mm
Outlet height:	1,185 mm
Weight:	45 kg

Coin Conveyor System SC 93770

Handles large quantities of coins after they have been sorted by the SC Active 4000. Coins from the SC Active 4000 fall down onto conveyors transporting each denomination to its specific coin wagon SC 93400.

Transparent covers (for inspection) reduce noise level for increased comfort and can be lifted for easy access. Choose a system for 2, 4, 6 or 8 denominations. Coin wagons are not included and have to be ordered separately.

Technical Specifications

Height:	800 mm
Width:	1,600 mm
Depth:	630 - 2,300 mm

Coin Wagon SC 93400

Solid wheels and handle make the wagon easy to move. The transparent plastic plexiglass cover can be sealed to protect the content. The wagon has noise reduction and is designed to be connected to the coin lift SC 93365 or the coin conveyor system SC 93770.

Technical Specifications

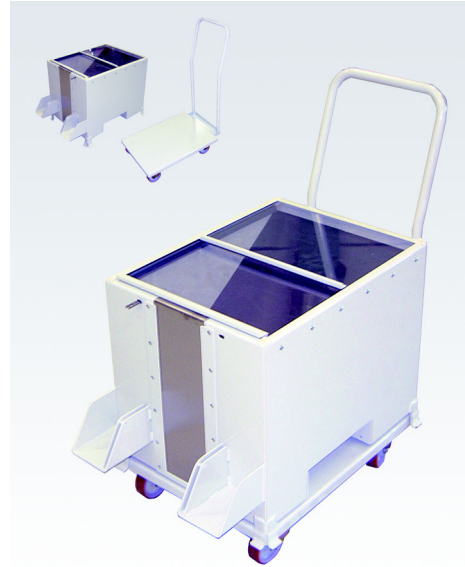

Volume:	18,000 coins (30 litres)
Height:	600 mm
Width:	450 mm
Depth:	600 mm

Container SC 94220 with Trolley SC 94200

As coin wagon SC 93400. Stackable by means of fork-lift truck.

Technical Specifications

Volume:	18,000 coins (30 litres)
Height:	600 mm
Width:	450 mm
Depth:	600 mm

Coin Roll Lift SC 93750

Designed to receive coin rolls from *one* wrapping machine. Developed to meet high demands on quality. The belt is equipped with wear-resistant stainless steel flights.

For personal safety the machine stops automatically if the operator tries to reach a coin roll while the machine is running. As option an extra button is available for the operator to start/stop the machine from a remote position (for example from the packaging table).

Technical Specifications

Capacity:	40 rolls/min.
Height:	1,570 mm
Feeding height:	150 mm
Outlet height:	800 - 1,100 mm
Weight:	35 kg
Horizontal conveyor length:	670 mm

Coin Roll Lift SC 93700

As coin roll lift SC 93750, but designed to receive coin rolls from *two* wrapping machines.

Technical Specifications

Capacity:	80 rolls/min.
Height:	1,570 mm
Feeding height:	150 mm
Outlet height:	800 - 1,100 mm
Weight:	60 kg
Horizontal conveyor length:	1,450 mm

Packaging Table SC 92805

Assists the operator to manually pack coin rolls into prefabricated *plastic bags* for vacuum packaging.

Possible to integrate with SC 93750 and wrapping machines for start/stop function. Used together with SC 92790 vacuum machine.

Technical Specifications

Capacity:	40 coin rolls per minute
Height:	700 mm
Length:	1,200 mm
Depth:	800 mm

Packaging Table SC 92845

Assists the operator to manually pack coin rolls into *carton boxes*.

The lines of coin rolls are pushed with a shuttle into a carton box. The position of the box will automatically be leveled correctly for every push of coin rolls into the box.

To deliver this equipment SCAN COIN needs to know the dimensions of the carton boxes and the size of the different coin rolls.

Technical Specifications

Capacity:	40 coin rolls per minute
Height:	700-900 mm
Length:	1,200 mm
Depth:	800 mm

Shrink Wrapping Line SC 94045

The most cost-effective solution for packaging coin rolls. Totally automatic process to pack coin rolls into plastic packages with for example 10 or 20 coin rolls in each package.

Includes infeed conveyor for 3-4 wrapping machines and outfeed roller track. Possibility to supervise the wrapping machines from the SC 94045 to achieve a complete and integrated solution.

Technical Specifications

Capacity:	up to 160 rolls/minute
Length:	2,800 mm
Width:	750 mm

Checkweigher/Labeller SC 94800/SC 95300

Checkweighing and labelling units for coin roll packages and coin bags. Automatic reject of not accepted packages.

Technical Specifications

Capacity:	10 packages/min, max. 10 kg
Label size:	100x100 mm
Length:	1,200 mm
Depth:	600 mm
Reject:	SC 94800 - left SC 95300 - right

Single Point Feeding System SC 95450

Feeding system for feeding loose coins from a silo to three wrapping machines. Big silo with vibrating feeder continuously feeding the coins to the wrapping machines.

Takes less space and also secures the supply of coins to the wrapping machines.

Technical Specifications

Capacity:	>6,000 coins/minute
Silo capacity:	180,000 coins (300 litres)
Height:	1,800 mm
Width:	800 mm
Depth:	3,700 mm

Pallet Loader SC 94900

Fully automatic pallet loader for shrink wrapped coin rolls. Picks the packages with vacuum and places them in programmed pattern on pallets. Designed for packages with 10 rolls (2x5 rolls). Two pallets in loading position makes it possible to replace one pallet when it is full without stopping.

Technical Specifications

Capacity:	12 packages/minute
Height	2,000 mm
Width	2,900 mm
Depth	1,800 mm

Founded in 1966, SCAN COIN is one of today's leading suppliers of cash processing equipment, system solutions and services. SCAN COIN develops, manufactures and markets equipment and integrated solutions for handling banknotes and coins, and has become a world leader in the automatic cash processing market. Our world-wide customer base is served through a network of SCAN COIN companies and distribution partners covering some 120 countries.

This brochure covers some of the standard Auxiliary Cash Handling Equipment supplied by SCAN COIN Intramat. SCAN COIN Intramat can also offer specially designed accessories according to specific customer needs. As a consultancy service SCAN COIN Intramat can also assist in making a complete layout for your Cash Centre.

Enquiries, orders and technical support are handled by SCAN COIN Intramat AB.

Service is available worldwide through a network of SCAN COIN factory-trained service specialists.
