Features:	Automatic start/stop Accumulation mode External thickness adjustment Built-in carrying handle Counting, Separating, Bagging, Wrapping

Count / Sort / Wrap

Equipped with batching modes, the GEM-200 will not only accurately count your coin but can also be set to wrap by switching to "batch mode". In batch mode the GEM-200 will automatically "batch stop" once it has counted the correct number of coins to fill a specific coin tube.

Versatility and speed

Manufactured as a low cost coin counter, the GEM-200 continues to meet and exceed your unique needs and expectations. Processing 2200 coins/minute the GEM-200 is a versatile and cost-effective coin processing machine that enables you to count sort and wrap all denominations of coin.

Practical standard features

Batching enables you to either wrap your coin into rolls or bag a certain amount of coins per bag. Select your batch amount and once the GEM-200 has processed that number of coins it will automatically stop. By selecting the ADD button the GEM-200 will display your cumulative total count.

Value

With the portability and performance you expect, the GEM-200 offers you added time savings at a fraction of the cost of hand counting. Contact GEMSYS today for a unique analysis of how the GEM-200 can save you time and money. Now that's value!
