Impressive standard features

Using the worlds most reliable image processing technology the SB-7 provides fast and accurate counting of Canadian and U.S currency. The SB-7 comes standard with the ability to count mixed bundles of bills and provide the total dollar value as well as individual value for each denomination counted. The SB-7 can also sort the Canadian and U.S. currency into individual denominations.

The SB-7 is a highly reliable and accurate two pocket desktop currency discriminator. As the world's smallest currency discriminator, the SB-7 allows you to obtain a dollar value count of bills processed and use the same machine to sort the bills into the various denominations. This can help you to improve accuracy while also saving you hours from cash handling activities. The SB-7 is best suited for organizations that are looking for more functions then offered by a standard currency counter.

Improve accuracy; Ensure savings!

The SB-7 can save you hours of time counting bills while ensuring an accurate count because it uses the most reliable image processing technology offered in the world. The SB-7 can help you sort bills by denomination and ensure that the value of money being deposited is correct. Until the introduction of the SB-7, these features were only found on more expensive currency discrimination machines.

Reliability and speed

Designed as a commercial quality currency counter, the SB-7 is sure to meet your unique needs with its unrivaled accuracy and speed. Counting up to 1500 bills per minute with selectable pre-set batch settings or program a unique batch setting using the 10 digit keypad.

Big Savings in a small package

With a modern design and full graphic LCD display, the SB-7 provides the operator with a more comfortable and efficient work environment. Having a reject pocket, the SB-7 can perform more functions then a standard currency counter. While counting, all unrecognized banknotes and strange banknotes are automatically diverted to the reject pocket assuring the operator of continuous operation while ensuring absolute accuracy.
