

SAVES TIME, MONEY, STRESS - AND SPACE.

V2R Side-Car Safe

NKL Autobank Side-by-Side Safes give retailers complete cash-handling capabilities without the clutter. The D8C 80-tube dispenser is fully automated – the door never needs to be opened to load tubes and there are no knobs to turn to get tubes out. A tube-lock prevents fishing. An anti-fish manual drop drawer is also provided. The V2R Side-Car Safe features two CashCode Validators with two 1,500-note cassettes for a massive 3,000-note total capacity occupying less than eight inches of additional footprint width for the system. Also available is a V1R Side-Car Safe that has one CashCode Validator with one cassette, offering a 1,500-note total capacity. As a system, the validators and vending features combine to make it easy to track all money flow from point-of-sale to the bank with or without armored car service. Two safes, one footprint, totally integrated financial and security control. The patented AuditLok XLV controller electronics in the D8C allow full integration between these two safes and with other Autobank safes to enable even greater system expansion. Step up to superior space-saving cash handling.

Interior compartment with manual drop drawer

80-tube dispensary

V2R Side-Car Safe: 3,000-note total bill validating capacity

PRODUCT: Side-by-Side System

DESCRIPTION: Autobank Dispensing and Validating Side-by-Side System
